

Sathwik Golla

Bachelor of Technology (B.Tech) in Computer Science Engineering — CMR Institute of Technology — 2023–2027
9059002443 — sathwikgolla06@gmail.com — linkedin.com/in/sathwik-golla — github.com/sathwikgolla — Portfolio

PROFESSIONAL SUMMARY

Software engineering-focused Computer Science undergraduate skilled in building scalable full-stack MERN applications using React.js, Node.js, Express.js, and MongoDB with hands-on experience in RESTful API development, authentication systems, backend optimization, and production-ready application deployment.

EDUCATION

CMR Institute of Technology — B.Tech in Computer Science Engineering — CGPA: 8.54 — 2023–2027

TSBIE Board — Senior Secondary (Class XII) — 95.9% — 2021–2023

SSC Board — Secondary Education — CGPA: 10.0 — 2021

PROJECTS

CampusTracker – Smart Faculty Availability & Timetable Management System

Live — GitHub

React.js, Node.js, Express.js, MongoDB, JWT, Tailwind CSS

- Architected a full-stack faculty tracking platform for CMRIT with optimized MongoDB indexing and RESTful API workflows, improving timetable retrieval performance by 30%.
- Implemented secure JWT-based authentication, email OTP verification, authorization middleware, and role-based access control workflows for Students, Teachers, and Admins.
- Designed and optimized RESTful CRUD APIs for faculty management, timetable scheduling, authentication handling, and secure MongoDB-backed backend services.

PrepFlow – Coding Interview Preparation Platform

Live — GitHub

React.js, Node.js, Express.js, MongoDB

- Engineered a scalable coding interview preparation platform featuring structured DSA, OS, DBMS, CN, and Full Stack learning modules with personalized progress tracking workflows.
- Architected modular RESTful APIs for authentication, question management, notes handling, and user workflow management using Express.js, MongoDB, and secure backend routing.
- Built responsive React.js dashboards with streak analytics, advanced filtering, daily planning, and weak-topic detection features to enhance personalized learning workflows.

RoomBites – Campus Food Delivery Web Application

Live — GitHub

React.js, Node.js, Express.js, MongoDB, Tailwind CSS

- Developed a scalable MERN-based campus food delivery platform supporting classroom and hostel ordering workflows with multi-role access architecture.
- Implemented optimized state-management workflows using React and Node.js, reducing checkout latency by 200ms and improving ordering performance.
- Developed scalable RESTful CRUD APIs and responsive React.js interfaces for dynamic order management, delivery assignment, and role-based workflow orchestration.

FindAndLost – Lost & Found Management Portal

Live — Live-QB9A — GitHub

Next.js, Node.js, Express.js, MongoDB, JWT, Cloudinary

- Architected a secure lost-and-found platform with item reporting, image uploads, advanced filtering, search functionality, and dynamic item status tracking.
- Designed scalable MongoDB schemas and RESTful APIs for authentication, report handling, item management workflows, and secure backend request processing.
- Integrated JWT authentication, request validation middleware, Cloudinary image storage, and secure API handling practices to strengthen backend security and scalability.

TECHNICAL SKILLS

Languages: Java, JavaScript, Python, C, SQL

Frontend: React.js, Next.js, HTML5, CSS3, Tailwind CSS, Bootstrap, Responsive UI, State Management, Component-Based Architecture

Backend: Node.js, Express.js, RESTful APIs, JWT Authentication, Authorization Middleware, RBAC, CRUD Operations, API Integration, Backend Architecture

Databases: MongoDB, MongoDB Atlas, MySQL, Database Indexing, Schema Design

Tools & Platforms: Git, GitHub, Docker, Postman, AWS EC2, Vercel, Render, Jenkins, Nginx, PM2, Cloudinary

Core CS: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks, Problem Solving, System Design Fundamentals

ACHIEVEMENTS & CERTIFICATIONS

Ground Reality Summit – BITS Pilani

Mar 2025

Ranked in the Top 3% nationally among 2000+ participants and 200+ teams by presenting scalable campus technology solutions and product scalability strategies to industry experts and VCs.

Google AI-ML Virtual Internship – Google Developers

Oct 2024–Dec 2024

Developed TensorFlow-based image classification model achieving 92% accuracy and completed NLP-driven sentiment analysis workflows using machine learning techniques.

Deloitte Technology Job Simulation – Forage

Jun 2025

Developed Python-based ETL automation scripts that streamlined data validation workflows, saving an estimated 15+ manual hours per week during peak reporting cycles.

Python Programming Certification – Scaler

Aug 2024

Completed 50+ coding challenges covering DSA and Python fundamentals; scored 95% in final assessment.
