

Sathwik Golla

B.Tech Computer Science Engineering — CMR Institute of Technology — 2023–2027
9059002443 — sathwikgolla06@gmail.com — linkedin.com/in/sathwik-golla — github.com/sathwikgolla

PROFESSIONAL SUMMARY

Computer Science undergraduate skilled in building scalable full-stack MERN applications using React.js, Node.js, Express.js, and MongoDB with hands-on experience in RESTful API development, authentication systems, and secure backend engineering.

EDUCATION

CMR Institute of Technology — B.Tech in Computer Science Engineering — CGPA: 8.54 — 2023–2027

TSBIE Board — Senior Secondary (Class XII) — 95.9% — 2021–2023

SSC Board — Secondary Education — CGPA: 10.0 — 2021

PROJECTS

CampusTracker – Smart Faculty Availability & Timetable Management System

React.js, Node.js, Express.js, MongoDB, JWT, Tailwind CSS

- Architected a high-concurrency faculty tracking system for CMRIT, optimizing timetable retrieval speeds by 30% through indexed MongoDB queries and efficient RESTful API design.
- Engineered secure JWT authentication and email OTP verification workflows with role-based access control, protected routes, and backend middleware for Students, Teachers, and Admins.
- Designed and optimized RESTful APIs for faculty management, timetable workflows, authentication handling, and secure MongoDB-backed backend operations.

PrepFlow – Coding Interview Preparation Platform

Live — GitHub

React.js, Node.js, Express.js, MongoDB

- Developed a full-stack coding interview preparation platform featuring structured DSA, OS, DBMS, CN, and Full Stack learning modules with personalized progress tracking.
- Architected scalable REST APIs for authentication, question management, notes handling, and user learning workflows using Express.js and MongoDB.
- Built responsive React.js dashboards with streak analytics, advanced filtering, daily planning, and weak-topic detection features to improve interview preparation efficiency.

RoomBites – Campus Food Delivery Web Application

Live — GitHub

React.js, Node.js, Express.js, MongoDB, Tailwind CSS

- Engineered a campus food delivery platform supporting classroom and hostel-based ordering workflows with scalable multi-role architecture.
- Engineered a multi-tenant ordering architecture using React and Node.js, implementing a custom state-management logic that reduced checkout latency by 200ms.
- Developed scalable REST APIs and responsive React.js interfaces for dynamic order management and delivery assignment workflows.

FindAndLost – Lost & Found Management Portal

Live — Live-QB9A — GitHub

Next.js, Node.js, Express.js, MongoDB, JWT, Cloudinary

- Architected a secure lost-and-found platform with item reporting, image uploads, advanced filtering, search functionality, and real-time item status tracking.
- Developed scalable MongoDB database models and REST APIs for authentication, report handling, item workflows, and secure backend operations.
- Integrated JWT authentication, validation middleware, Cloudinary image storage, and secure API handling practices to improve backend security and scalability.

TECHNICAL SKILLS

Languages: Java, JavaScript, Python, C, SQL

Frontend: React.js, Next.js, HTML5, CSS3, Tailwind CSS, Bootstrap, Responsive UI

Backend: Node.js, Express.js, REST APIs, JWT Authentication, RBAC, CRUD Operations, API Integration

Databases: MongoDB, MongoDB Atlas, MySQL

Tools & Platforms: Git, GitHub, Docker, AWS EC2, Postman, Vercel, Render, Jenkins, Nginx, PM2, Cloudinary

Core CS: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks, Problem Solving

ACHIEVEMENTS & CERTIFICATIONS

Ground Reality Summit – BITS Pilani

Mar 2025

Ranked in the Top 3% nationally among 2000+ participants and 200+ teams; presented scalable campus technology solutions to industry experts and VCs.

Google AI-ML Virtual Internship – Google Developers

Oct 2024–Dec 2024

Built TensorFlow image classification model achieving 92% accuracy and completed NLP-based sentiment analysis project.

Deloitte Technology Job Simulation – Forage

Jun 2025

Developed Python-based ETL automation scripts that streamlined data validation workflows, saving an estimated 15+ manual hours per week during peak reporting cycles.

Python Programming Certification – Scaler

Aug 2024

Completed 50+ coding challenges covering DSA and Python fundamentals; scored 95% in final assessment.
